TABLE OF CONTENTS

INTRODUCTION

CHAPTER 1: The Beginning of Gold Mining Activities

- Civilisations Mining and Using Gold
- Modern Day Gold Mining

CHAPTER 2: The Top 10 Gold Mining Countries

- Top 10 Countries
- Largest Verified Gold Deposits

CHAPTER 3: The Different Geological Settings Associated with Gold

- Different Geological Settings
- Geological Survey Maps

CHAPTER 4: Types of Gold Deposits, Prospecting and Sampling, Mining Techniques, and Equipment

- Mining Techniques and Equipment
- Small, Medium And Large Scale Mining Equipment
- Small-Scale Mining
- Medium -Scale Mining
- Large-Scale Mining
- Gold Prospecting and Sampling
- Surface Sampling
- Underground Sampling
- Sampling Tools and Equipment
- Panning
- Sluicing
- Wash Plant
- Trommel
- Metal Detecting
- Dredging for Gold
- Technology and the Future of Gold Mining
- The Use of AI in Mining Operations
- AI and the Future of Gold Mining
- Anticipated Future Developments in Gold Mining

TABLE OF CONTENTS

CHAPTER 5: Mining Licenses and Regulatory Framework

- Mining Licenses and Regulations
- Exploration / Prospecting License
- Mining Claim, Lease or Permit
- Buying Gold
- Applying for A License
- Customary and Informal Practices: A Case Study.

CHAPTER 6: Raising Finance for Medium to Large-Scale Mining Projects

- Steps To Raise Finance For A Gold Mining Project
- Financing Options
- Listing Rules and Regulatory Compliance
- Best Locations for Floating a Gold Exploration Project

CHAPTER 7: The Different States of Gold

- Gold in its Natural State
- The Complete Mining Process

CHAPTER 8: Refining Gold

- Purpose of Gold Refining
- The Gold Refining Process
- Places to Refine Gold
- Gold Classifications
- Carat Grading System

CHAPTER 9: The Future of Gold as an Investment

- Gold Prices and Performances
- Projection for Future Gold Prices
- Large-Scale Gold Mining Operations

CONCLUSION

GLOSSARY

Definitions of key terms and jargon used in the industry

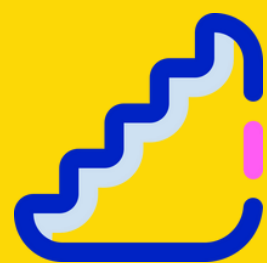

APPENDICES

APPENDIX 1: List of essential resources, contacts, and networking platforms

APPENDIX 2: Sample Legal documents and licences

INTRODUCTION

The Beginning of Mining Activity

INTRODUCTION

What You Will Learn

This book aims to save you time learning about the entire gold mining process. You shall learn:

- How to identify those locations where gold reserves are more likely to be found (Chapters 2 - 3);
- The mining techniques and equipment used for small, medium, and large scale mining projects (Chapter 4);
- The mining licenses and regulations that may apply, and how to apply for an appropriate licence (Chapter 5);
- How to raise money / finance for medium to large-scale mining projects (Chapter 6);
- The different forms / states of gold (Chapter 7);
- The purpose of refining gold and the process used (Chapter 8); and
- The future of gold as an investment (Chapter 9).

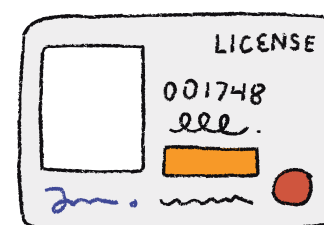

Gold prospector

A person decides to search for gold

Prospecting licence

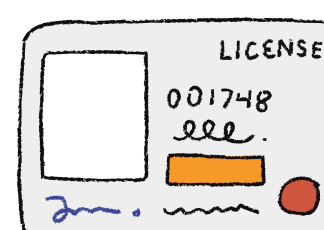

Miner applies for prospecting licence

Miner explores locations and samples soil for deposits

Mining licence

Miner identifies gold despoths and applies for mining license

Miner establishes mine and begins processing gold ore to extract gold deposits.

CHAPTER 1

The Beginning of Gold Mining Activities
